General information on ECTS and the Bologna Process

In June 1999, in Bologna, 29 European Ministers for Education signed a declaration aiming to establish a European higher education area by 2010, in line and in parallel with the aims of the Lisbon process. The ultimate aim of the Bologna Process is to encourage mobility in the field of higher education between the different European countries during their studies and ensure transferability and recognition of qualifications. In this context, the ECTS (European Credit Transfer and Accumulation System) plays a primary role.

The ECTS is a system for the accumulation of transferable credits initiated by the European Union. It is based on mutual recognition between university programmes of the individual workload achieved by the student to attain the objectives of their programmes. The term workload describes the amount of time needed by an average student to attain the results, defined in terms of knowledge and competencies. The ECTS facilitates not only the academic acknowledgement for period of studies spent abroad and the mobility of students in Europe, but it is also the priority tool to implement the system of accumulation of credits. Credits are a way to quantify the sum of science and knowledge acquired by students and to make their accumulation comparable and transferable. Therefore, these credits can only be obtained after the results of the knowledge acquired by students have been properly evaluated at the end of their studies and the students have attained at least the minimum pass standard. ECTS credits are hence based on the workload of a student during the period corresponding to the programme of studies. Key-documents of ECTS are:

The information package/course catalogue

This document makes study programmes easy to understand and compare for all students and staff – local and foreign – and provide them with essential institutional, academic and practical information. This is the regular Information package for the EOA programme; it is published in English on the EOA Website.

The learning agreement

The ECTS Learning Agreement guarantees the transfer of credit for courses. It contains the list of course units or modules which the student plans to take. For each course unit/ module the title and the ECTS credit are indicated. It has to be signed by the EAO, the student and the home institution. The competent authority of the home university carries out the recognition on the student's return.

The transcript of records

The Transcript of Records documents the performance of a student by showing the list of courses taken, the ECTS credits gained, local or national credits, if any, local grades and possibly ECTS grades awarded. In the case of credit transfer, the Transcript of Records has to be issued by the home institution for outgoing students before departure and by the host institution for incoming students at the end of their period of study.

1. Information on the EOA programme

1. General Description

The European Online Academy (www.eu-online-academy.org) was initiated in 2003. The second EOA took place in 2004/2005 and lasted until July 3rd 2005. The third consecutive year of the EOA will start on 15th October 2005 and will last until July 2006.

Over the past few years **European Integration** has become an ever more relevant and complex issue. The European Union is a crucial element of Europe's political architecture and thus for all political systems in Europe. The provisions in the EU treaties cover every aspect of public policies. Knowing and understanding the political system of the EU and its policies however, has become a highly essential - but also difficult - part of one's general knowledge of Europe.

In order to respond to an ever-increasing demand, the **European Online Academy** seeks to combine two elements: European integration and new media as a meeting point of colleagues and fellow participants and a place of information resources on recent EU developments.

The EOA offers comprehensive information on recent developments of the European integration process and up-to-date insight into proceedings and policy areas. The virtual workplace pulls resources from the web, processes resources into results and places them as new resources back into the web.

But the European Online Academy is not only virtual. It recognises the paramount importance of face-to-face contact. The project involves recognised experts with academic and practical background as teachers, tutors and researchers.

The EOA e-learning platform and the intensive presence workshops in Berlin, Prague, Rome and Brussels create a physical as well as virtual intercultural and multidisciplinary workspace.

2. Target Groups

Through a combination of e-learning and compact face-to-face-learning phases the EOA is an ideal training and additional qualification for young professionals, postgraduates and junior officials interested in or already working in the field of European integration.

The main target Groups are hence professionals, junior officials, researchers and postgraduate students. The European Online Academy expects participants to already have some background knowledge on the functioning of the EU and its policies (an introductory overview will be given for all courses.) The main focus will, therefore, be on updating the information on recent EU developments, and above all the processes of EU widening and deepening. The European Online Academy works with the different backgrounds and needs of the individual participant. Moreover, the academy seeks to integrate the various experiences and expertise of its participants within its programme.

3. Curriculum and programme diagram (with ECTS credits)

All participants have to take part in at three compulsory courses in the first trimester which will provide the necessary introductory and multidisciplinary background with regard to the development of the EU system. The optional courses will give the participants the opportunity to study specific areas of interest more depth. In order to meet the requirements for completion of the programme, each participant must follow at least three optional courses in each trimester. A European Council simulation on three controversial items taken from the political reality is scheduled for the second trimester - participation is compulsory. Participants will also have the opportunity to take part in different types of extra-curricular offers provided online or at the workshops, which shall provide them with additional practical knowledge and skills necessary for their participation in the course as well as for their professional development in general (without exams).

First trimester (October 15, 2005 – January 15, 2006)		
First workshop October 21 - October 23, 2005 (Berlin): Introduction to EOA programme and to the three compulsory courses:		
"Institutional architecture of the EU" (Prof. Wessels) 3 ECTS Credits	"History of European Integration" (Dr. Marhold) 3 ECTS Credits	"Introduction to European Law" (Prof. Pernice) 3 ECTS Credits
Written Exams in compulsory courses at second workshop in Prague		

Second trimester (January 16 – April 9, 2006)			
Second workshop January 13 - January 15, 2006 (Prague): Written Exams in compulsory courses and introduction to optional courses of 2 nd term:			
“European Law in Action” (Prof. Pernice)	“Political aspects of EU widening” (Prof. Bafoil)	“The European Union in the international system” (Dr. Smith)	“EMU and the Stability and Growth Pact” (Prof. Le Cacheux)
3 ECTS Credits	3 ECTS Credits	3 ECTS Credits	3 ECTS Credits
Three optional courses out of four plus online preparation of the simulation game Completion of Simulation during third presence workshop in Rome, 3 ECTS Credits			

Third trimester (April 10 – July 9, 2006)			
Third workshop April 7 – April 9, 2006 (Rome): Simulation game and introduction to optional courses of 3 rd term:			
“Economic dimension of EU integration” (Prof. Inotai)	“Justice and Home Affairs” (Mrs. Correira)	“Interest Representation in the EU” (Prof. Greenwood)	“Sustainability in the EU” (Dr. Niestroy and Mr. Meuleman)
3 ECTS Credits	3 ECTS Credits	3 ECTS Credits	3 ECTS Credits
Three optional courses out of four plus preparation for the final exams in optional courses Written exams in optional courses at final workshop July 7 – 9, 2006 (Brussels/ Brugge)			

4. Admission requirements and application procedure

The programme is open for applications of all nationalities, already holding at least a qualification in higher education which meets the European qualification frameworks basic requirements for first cycle qualifications of 180 to 240 credits (i.e. B.A or equivalent).

The working language is English, thus solid knowledge of the English language is a prerequisite for participation.

All applicants must complete the online registration form with information about:

- their Curricula Vitae
- their academic qualifications (diplomas, degrees) and practical experiences
- their motivation and interest in the EOA programme

The EOA team of CIFE Berlin and the General Director of CIFE select the candidates on the basis of the information provided in the registration form.

The total number of participants will be limited to 35.

5. Final examination and assessment regulations

For a successful completion of the programme, the participant has to:

- A. study the respective online-material and participate actively in all compulsory and optional courses and fulfil all written (online) assignments
- B. participate in at least three of the four presence workshops
- C. participate actively in the EOA simulation game
- D. pass the final written examinations in the three compulsory and six chosen optional courses

In the framework of ECTS a grading scale has been developed to facilitate the understanding and comparison of grades given according to different national systems. It has no national reference point and aims at an objective evaluation of student abilities relative to those of other students within the same system. It was not designed to replace national systems, but to enhance the understanding of them in other countries. The ECTS grading scale ranks the students on a statistical basis. Therefore, statistical data on student performance is a prerequisite for applying the ECTS grading system. The ECTS Grade equals the percentage of successful students normally achieving that particular grade - as displayed in table below: (For a better comparison to national marking systems the English, French and German grade s have been added accordingly)

ECTS-grade	percentage	definition	National (French) grade	National (German) grade
A	10 %	EXCELLENT - outstanding performance with only minor errors	> 15/20	1+ and 1
B	25 %	VERY GOOD - above the average standard but with = some errors	> 14/20	1- and 2+
C	30 %	GOOD -generally sound work with a number of notable errors	> 12/20	2, 2- and 3+

D	25 %	SATISFACTORY - fair but with significant shortcomings	> 10/20	3 and 3-
E	10 %	SUFFICIENT - performance meets the minimum criteria	at least 10/20	4+ and 4
FX		FAIL- some more work required to pass	> 5/20	4-/5
F		FAIL – considerable further work required	5/20 or less	5-/6

A distinction is made between the grades FX and F that are used for unsuccessful students. FX means: "fail- some more work required to pass" and F means: "fail – considerable further work required". The inclusion of failure rates in the Transcript of Records is optional.

6. Qualification and ECTS credits awarded

After the successful completion of the programme the participants receive a 'Certificate of European Studies' which is issued by the CIFE and signed by its General Director, Dr. Hartmut Marhold and Prof. Wolfgang Wessels, Jean-Monnet Professor for Political Science and European Affairs at the University of Cologne.

The credits awarded for a successful completion of this part-time studies programme add up to 30 corresponding to a workload of 750 hours in total, i.e. 75 hours for each course module and the simulation game. Students need to be successful and be awarded a passing grade in order to receive the credits for the course module concerned.

7. Educational and professional goals

The programme is primarily designed as a specialised training and additional qualification for young professionals, postgraduates and junior officials interested in or already working in the field of European integration.

Through the award of ECTS credits on the one hand, and a certificate issued by renown institutes in the field of EU studies on the other hand, the achievements of the successful completion of the programme can be recognised as both academic and professional qualifications of the participants.

8. Access to further study programmes

At the moment there is no advanced study programme offered by the CIFE. For 2006-2007 it is planned to introduce the possibility to obtain a Masters degree after additional advanced studies. More details will be published soon.

9. ECTS departmental co-ordinators

For questions concerning ECTS credits contact Dr. Helgard Fröhlich or Juliane Büniger at cife-berlin@cife.org.

2. Academic staff and experts for the EOA programme

The EOA lecturers are recognised experts with academic and practical background as professors, tutors and researchers. The experts participating in the EOA are:

Prof. François Bafail – Head of Research of CERI et Science Po (Paris)

Prof. Jacques Le Cacheux - Université de Pau et Science Po (Paris)

Mrs. Dora Correia - European Commission Brussels, DG Justice, Freedom and Security

Prof. Justin Greenwood - University Aberdeen

Prof. András Inotai - Institute for World Economics (Budapest)

Dr. Hartmut Marhold – General Director of CIFE

Mr. Louis Meuleman - RMNO (Advisory Council for Research on Nature and the Environment)

Dr. Ingeborg Niestroy – EEAC (European Environment and Sustainable Development Advisory Councils) Brussels

Prof. Ingolf Pernice – Walter-Hallstein-Institut Humboldt University (Berlin)

Dr. Karen E. Smith – London School of Economics and Political Science

Prof. Wessels - Jean Monnet Chair for Political Science Cologne University

Each course is taught by one professor - in the case of 'Sustainable Development in the EU' by two professors - who is/are responsible for the content and the examination. General assistance and tutoring is offered by the EOA team.

3. Description of the EOA course modules

1. Institutional architecture of the EU

Theme/Topic:	The institutional architecture of the EU – evolution and reforms
Expert:	Prof. Wolfgang Wessels , Universität Köln, Jean Monnet Chair
Character:	obligatory
ECTS-Credits:	3 Credit-points
Teaching methods:	lecture, seminar and discussion at the presence workshop
Assessment methods:	final exam at the end of the term, assignments, active participation in workshop and forum discussion
Language:	English

Objective and course content:

The present course focuses on the explanation of the institutional architecture according to the status quo giving outlooks on the provisions of the CT. In a first part, we will take a look at the leitmotives of EU system development and at the methods of treaty revisions before concentrating on the 2000 IGC and the Nice Treaty compared to the Convention and the Constitutional Treaty.

In a second part, we will then analyse the evolution of the institutional architecture focusing on the status quo, but also pointing out the differences, which the CT will produce, once entered into force. The last chapter is dedicated to the different scenarios of deepening and widening with and without the Constitutional Treaty.

2. History of European integration

Theme/Topic: History of European Integration
Expert: **Dr. Hartmut Marhold**, General Director of CIFE
Character: obligatory
ECTS-Credits: 3 Credit-points
Teaching methods: lecture, seminar and discussion at the presence workshop
Assessment methods: final exam at the end of the term, assignments,
active participation in workshop and forum discussion
Language: English

Objective and course content:

Participants should get a general vision of historical factors shaping European integration. They should be able to distinguish between different eras of the integration process and know the main characteristics and dynamics of these eras. The course is intended to frame a set of structural and historical patterns which can explain the integration dynamics and its stagnation, factors related to internal (functional) as well as external (competition with superpowers and nation states) constraints.

3. Introduction to European Law

Theme/Topic: European Law I – Basics of European (constitutional) Law
Expert: **Prof. Ingolf Pernice**, Walter-Hallstein-Institut
für Europäisches Verfassungsrecht , Berlin
Character: obligatory
ECTS-Credits: 3 Credit-points
Teaching methods: lecture, seminar and discussion at the presence workshop
Assessment methods: final exam at the end of the term, assignments,
active participation in workshop and forum discussion
Language: English

Objective and course content:

Introduction into some understanding of European Constitutional Law in general: Treaties and Constitution, the autonomy of European law, its relationship to national constitutional law. The pillar-structure of the EU and the new treaty on a Constitution for Europe, multilevel constitutionalism and the EU divided-power system. Competences of the EU, Institutions, decision-making procedures, legislative acts, in particular directives and their direct effect. Methods and problems of implementation, liability of Member States for infringements, fundamental rights and the system of legal protection by national Courts and the ECJ.

Introductory paragraphs on the institutions and basics of European Law: EurLex-website
<http://europa.eu.int/eur-lex/en/about/index.html> (“About EU law”)

4. European Law in action – leading cases

Theme/Topic: European Law in action – leading cases
Expert: **Prof. Ingolf Pernice**, Walter-Hallstein-Institut, Berlin
Character: optional
ECTS-Credits: 3 Credit-points

Teaching methods: lecture, seminar and discussion at the presence workshop

Assessment methods: final exam at the end of the term, assignments,
active participation in workshop and forum discussion

Language: English

Objective and course content:

Based on the introductory course on European Constitutional Law this optional course aims at more precise understanding of the EC-substantive law regarding the internal market and competition. It is based on the ECJ case law, beginning with the analysis of some classical leading cases, up to the more recent jurisprudence of the Court. Fellows will have to study carefully some 6 – 10 cases and produce answers to a list of questions put regarding each of these cases.

5. Political Aspects of EU-Widening

Theme/Topic: From communism to democracy – political aspects of EU-Widening

Expert: **Prof. Francois Bafoil**, CERI Paris

Character: optional

ECTS-Credits: 3 Credit-points

Teaching methods: lecture, seminar and discussion at the presence workshop

Assessment methods: final exam at the end of the term, assignments,
active participation in workshop and forum discussion

Language: English

Objective and course content:

The purpose of this course is to explain the different political, economic and social changes between 1989 and 2004 in Eastern Europe after the collapse of communism. This process is called 'Transition'. In order to explain these changes this course applies two theories: neo-institutionalism and Europeanisation. They serve as a tool in order to structure the transition period and to interpret and understand it. This course does not take into account foreign

policies considering that foreign policies of the Eastern countries were concentrated on one single object: integration.

This course is divided into four parts. Part one gives a historical overview of the events before and after 1989. Thereafter the theoretical framework will be developed and evaluated. Part three applies the historical and theoretical framework on the political transition in Eastern European countries. The last section focuses on economic transition.

- <http://www.iep-berlin.de/publik/EU25-Watch/index.htm> the successor of the Enlargement /agenda 2000 watch issued by the Institute for European Politics in Berlin. The European Union in the international system

6. The EU in the International System

Theme/Topic: The EU in the International System

Expert: **Dr. Karen Smith**, London School of Economics

Character: optional

ECTS-Credits: 3 Credit-points

Teaching methods: lecture, seminar and discussion at the presence workshop

Assessment methods: final exam at the end of the term, assignments,
active participation in workshop and forum discussion

Language: English

Objective and course content:

This course will examine the foreign relations of the European Union. The first part reviews the EU's decision-making institutions and procedures in this area; the second analyses its relations with a wide variety of countries and organisations around the world; the final part considers the future of the EU's foreign relations. Core questions examined include: does the EU produce 'foreign policy'? How significant and influential an international actor is the EU? Is the area of foreign, security and defence policy-making becoming more integrated?

7. Economic and Monetary Union and the Stability and Growth Pact

Theme/Topic: EMU and the SGP

Expert: **Prof. Jacques LeCacheux**, Sciences Po Paris

Character: optional

ECTS-Credits: 3 Credit-points

Teaching methods: lecture, seminar and discussion at the presence workshop

Assessment methods: final exam at the end of the term, assignments,
active participation in workshop and forum discussion

Language: English

Objective and course content:

The course is designed in such a way as to mobilize major analytical tools of economics to enlighten the various aspects of EU integration and processes of economic policymaking in the EU. It covers market integration, competition policy and their consequences, macroeconomic policies (monetary and fiscal) in the Eurozone, tax and social competition, etc.

The objectives of the course are to allow an understanding of major issues, problems, challenges and policy choices facing policymakers in the EU, while acquiring analytical skills in applied economics.

8. Economic dimension of EU integration in an enlarged EU

Theme/Topic:	Economic dimension of EU integration in an enlarged EU
Expert:	Prof. Andras Inotai , Institute for World Economics (Budapest)
Character:	optional
ECTS-Credits:	3 Credit-points
Teaching methods:	lecture, seminar and discussion at the presence workshop
Assessment methods:	final exam at the end of the term, assignments, active participation in workshop and forum discussion
Language:	English

Objective and course content:

The course combines three basic challenges the enlarged/enlarging EU is facing: global competition, community-level reforms and economic transformation in the new – and also in the EU-15 – countries. Enlargement is fundamentally shaping the future of the EU and raises the question of future-oriented vs. status-quo-oriented strategies. Key economic areas of the enlarged/enlarging EU will be examined in this context.

9. Sustainable Development in the EU

Theme/Topic: Sustainable Development in the EU

Expert: **Dr. Ingeborg Niestroy**, European Environment and Sustainable Development Advisory Councils, Brussels (EEAC)
and
Mr. Louis Meuleman, RMNO (Dutch Advisory Council for Research on Nature and the Environment)

Character: optional

ECTS-Credits: 3 Credit-points

Teaching methods: lecture, seminar and discussion at the presence workshop

Assessment methods: final exam at the end of the term, assignments,
active participation in workshop and forum discussion

Language: English

Objective and course content:

Sustainable Development has become an increasingly important concept for policy making in general, and for economic, social and environmental policies, as well as the global dimension in particular. It has become an overall objective for the EU and the EC, reflected in the respective Treaties. The course aims at giving insight in the concept of SD, its development and policy implications at EU level, which is naturally linked to the national and global level. It covers the important governance dimension of SD.

10. Justice and Home Affairs

Theme/Topic: Justice and Home Affairs

Expert: **Mrs. Dora Correia**, European Commission,
DG Justice, Freedom and Security

Character: optional

ECTS-Credits: 3 Credit-points

Teaching methods: lecture, seminar and discussion at the presence workshop

Assessment methods: final exam at the end of the term, assignments,
active participation in workshop and forum discussion

Language: English

Objective and course content:

To allow to participants to:

- understand the importance to pillar III's evolution and that of EU competence to delve into security issues of the EU Ministers' attempts since the 1970s to combat terrorism before and since the move towards an EU homeland security agenda;
- critically analyse the idea of the European Union as an 'area of security, justice and freedom', both as a general notion and in respect of its component parts;
- understand and assess EU policy in relation to key aspects of internal and external security, including the EU's emerging homeland security agenda, and its biometric instruments, Cooperation in Justice and Home Affairs including police cooperation, e-judicial cooperation, the implications of a common border guard, and the free movement of persons, immigration, asylum and refugees;
- draw links between EU policy and relevant conceptual ideas and frameworks such as 'securitisation' and 'security'; the idea of 'Europe'; the rule of law, justice and human rights; citizenship; and the implications of the securitisation of domestic policy for sustaining transparency and openness and democratic legitimacy at supranational and national levels of governance.

11. Interest Representation in the EU

Theme/Topic: Interest Representation in the EU

Expert: **Prof. Justin Greenwood**, University Aberdeen

Character: optional

ECTS-Credits: 3 Credit-points

Teaching methods: lecture, seminar and discussion at the presence workshop

Assessment methods: final exam at the end of the term, assignments,
active participation in workshop and forum discussion

Language: English

Objective and course content:

The course will

- Identify, describe and assess the different types of interests and features of their collective action.
- Examine the ways in which these interests contribute to the everyday policy-making, implementation, and monitoring, of EU public policy.
- Examine the extent to which organised civil society interests of all types contribute to the development of European integration, defined as both the extension of EU competencies and the development of EU democratic legitimacy.
- Examine the ways in which the special characteristics of the EU and its institutional configuration influences the contribution that producer and citizen interests make to EU policy-making and integration, and influences characteristics of EU collective action between civil society interests.

2. Description of the institution

Established in 1954, the CIFE is a private, international non-profit organisation, which includes several institutes and European studies courses as well as colloquiums, seminars and publications. The CIFE has consultative status with the Council of Europe and has offices in most of the member states of the European Union, as well as in some Central and Eastern European countries. It receives support from the European Union, the Franco-German Youth Office and other international organisations, from numerous national governments, as well as regional and local authorities, foundations, and private contributors.

3. Programmes offered

The programmes of the CIFE encompass educational and research activities concerning European unification and integration, federalism, regionalism and changes within the structures of contemporary society in accordance with a global federalist prospective. Among the different types of activities are:

University sessions

The CIFE and its member institutions, such as IEHEI, organise each year annual graduate and post-graduate programmes as well as Internet courses, evening courses and summer sessions, which bring together participants of all nationalities.

Seminars, colloquiums and conferences

The CIFE organises each year in various European countries seminars intended for different socio-professional groups and lecturers, covering the whole spectrum of issues raised by the process of European integration.

Several conferences also take place every year for academics, politicians, company executives and international experts.

Finally, upon request and in addition to its own public lectures held in various European cities, the CIFE may also provide speakers to associations, youth movements, high school etc.

Publications

The CIFE publishes each year:

books and brochures; a quarterly review in French: *L'Europe en formation*

4. Management

Founding Honorary President:	Alexandre Marc
President:	Jean-Claude Juncker
Director General:	Hartmut Marhold
Secretary General:	Claude Nigoul

5. Timing of the different study programmes

- October to July: Academic year of the European Online Academy
- October to June: Academic year of the M.A. in European and International Studies
- July to September: Summer schools
- Throughout the year: International Seminars and colloquiums

6. Admission and registration procedures

Each program offered by CIFE has its own procedure of admission and registration.

Jean-Monnet Chair for Political Science and European Affairs, University of Cologne

The Jean Monnet Chair at the Research Institute for Political Science and European Affairs in Cologne has, over the course of several semesters, developed and taught a differentiated program of European Affairs that has significantly broadened the knowledge of the almost 4.000 students of political science in this area. To meet the increasing academic and political challenges to EU studies the Jean-Monnet Chair for European Integration at the Research Institute for Political Science and European Affairs at the University of Cologne has developed a broad range of teaching and research activities.

Experiences with e-Teaching Activities:

- PolitikON: E-learning unit on "The EU in the international system"
- The "Course in Law and Politics of the EU system - PROTEUS"
- "Cologne-Paris Simulation – COPAS"
- The "Virtual Textbook"
- Teaching Europe: "The Core Curriculum" on European Integration Studies
- www.eu-training.de for the Federal Agency of Public Administration (Baköv)
- European Online Academy

CERI – Sciences Po (Paris)

The CERI, founded in 1952, within the *Fondation Nationale des Sciences Politiques* (FNSP), is France's foremost centre for research on the international political system. As a joint FNSP-CNRS research unit, the CERI is made up of some sixty researchers and about fifteen support staff who handle financial management, documentation, publications and communication.

The CERI's mission is to bring together area studies specialists and international relations experts. It analyzes the contemporary political world, with a strong emphasis on an interdisciplinary approach: its research fellows include not only political scientists but also economists, sociologists, historians and anthropologists. Most CERI fellows teach at Sciences Po in Paris and in other institutions of higher education in France and abroad. The CERI also hosts postgraduate students enrolled in the doctoral program of Sciences Po. CERI fellows are regularly consulted by various ministries, firms, parliamentary committees, and international organizations.

Activities of the CERI:

Colloquia and Study sessions are generally organized to mark the completion of a collective research project. The proceedings usually lead to publications. Lecture-Debates led by a researcher or expert offer an opportunity to take stock of international current events in an interactive manner, Research seminars are mainly designed for research fellows and associates, who gather to present and discuss ongoing research within the CERI or the academic community.

Strategy seminars, organized primarily for CERI's Privileged partners, meet monthly, generally over breakfast, to ponder and debate the major issues facing the world today.

Institute for World Economics (Budapest)

The Institute for World Economics (IWE) carries out research and formulates policy recommendations on an objective basis, as part of the Hungarian Academy of Sciences. Established in 1973, it has become one of the major policy-oriented international research institutes and economic-policy think tanks in Central Europe.

Its main research task is to study the underlying trends and factors behind global and regional economic developments, and to examine their present and future impact on the Hungarian economy. In addition, it sets out to contribute to international research, through cooperation with top research institutes throughout the world.

Walter Hallstein - Institut der Humboldt-Universität zu Berlin

It focuses on research into the fundamental principles, structures and contents of a European constitutional order, based on a comparative analysis of constitutional law. Features of the Institute are the establishment of an international network of institutes having similar objectives in view to conducting co-operative research work and the usage of modern means of communication to launch an Europe-wide discourse on constitutional law. The Institute takes advantage of Berlin's geographical position and the Humboldt University's profile as "a bridge between East and West" and encourages a merger of theory and practice through practically and politically aligned events in Germany's capital. It also promotes public discussions and offers advice to political institutions about crucial questions regarding the European constitutionalization. The Institute organises a series of lectures on the issue of European constitutional law ("Forum Constitutionis Europae") as well as annual conferences and other events.

The Institute is an institution affiliated with Humboldt University's Faculty of Law, supported by an incorporated non-profit association. The chairmanship of the Institute is held jointly by Michael Kloepfer, professor of law and Ingolf Pernice, professor of law. Advisory duties are assigned to a Scientific Council and to an Advisory Board.

The core facility of the Institute is the special library on European Union and comparative constitutional law, affiliated with the Faculty's main law library. Another hallmark of the Institute to interact with the interested public via internet and other means of modern media in order to prompt discussions on the Institute's current issues.

The Institute emerged from a research project on European constitutional law supported by the DFG (Deutsche Forschungsgemeinschaft). Additional financial support was obtained from the European Commission. Perspectives of future financing include contributions coming from EU-institutions, the German Ministry of Foreign Affairs, the Government of Berlin and from members of the association supporting the Institute.

Institut für Europäische Politik e.V.

The Institut für Europäische Politik (IEP) has been a non-profit organization active in the field of European integration since 1959. It is one of Germany's leading foreign and European policy research institutes.

The IEP works with academia, politics, administration and civic education. Its task is to analyse the issues of European politics and integration in an academic way and to promote the practical application of its research results.

The IEP provides a European and interdisciplinary forum in Berlin for debate on European politics among experts from academia, politics, business and the media.
