Objective and course content:

The course is designed in such a way as to mobilize major analytical tools of economics to enlighten the various aspects of EU integration and processes of economic policymaking in the EU. It covers market integration, competition policy and their consequences, macroeconomic policies (monetary and fiscal) in the Eurozone, tax and social competition, etc.

The objectives of the course are to allow an understanding of major issues, problems, challenges and policy choices facing policymakers in the EU, while acquiring analytical skills in applied economics.
