Learning outcomes, methods and course content:

Three overarching subjects will be presented and discussed:

- (a) the EU's role in global competition (trade, investments, development of human factor – education, research and development, innovative societies, traditional and new factors of competitiveness)
- (b) the increasing importance of economic security (market access, global finance and the Euro, technology, supply security – energy, food, industrial inputs, water -, migration, environment and climate change, social values)
- (c) key bilateral relations (United States, China, Russia, emerging markets, neighbourhood relations)

The interdisciplinary character of all subjects will be continuously highlighted.

Participants acquainted with key global economic trends and the EU's position in the world economy, including Europe's strong and weak factors, between the external factors challenging the EU and the internal developments, both as a response to external impacts and as a key player influencing global economic trends.

European and International Studies

The methodology is based on comparative and policy-oriented approach that enables the students to understand and analyse macroeconomic statistics, identify fundamental economic challenges and different policy responses in global and European context.

The economy-focused but interdisciplinary character of the course is considered to be a relevant input for an active and fruitful discussion with students specialised in political and/or legal issues.
