Learning outcomes, methods and course content:

Contents:

- (a) The upgrading of economic security (mainly energy, migration and environment)
- (b) Internal factors of cohesion and differentiation (economic divergences, different impact of external factors on member countries, emerging nationalism and anti-EU movements, the necessity of two-way solidarity)
- (c) Consequences and management of a multi-speed EU: towards disintegration or a qualitative leap forward towards deepening the integration?

Assessment methods and skill and competences as above

The interdisciplinary character of all subjects is continuously highlighted, thus creating an excellent basis is created for discussion with the topics of the political and legal courses.

European and International Studies

Students are made acquainted with critical external and internal challenges of the European integration. On the one hand, external economic security challenges will be addressed and discussed. On the other hand, internal threats of cohesion (different member country priorities, undermining of key European values, nationalistic trends) will be dealt with in the context of how or whether to manage the critical mass of cohesion in a multi-speed European Union.
