1. Introduction

1.1. General information on ECTS and the Bologna Process

ECTS is the credit system for the accumulation of transferable credits used in the European Higher Education Area, involving all countries engaged in the Bologna Process. ECTS credits are to be considered one of the cornerstones of the Bologna process. The ECTS credit system is based on mutual recognition between university programmes of the individual workload achieved by the students to attain the objectives of their programmes. The term workload describes the amount of time needed by an average student to attain the results, defined in terms of knowledge and competencies.

Credits are a way to quantify the knowledge acquired by students and to make their accumulation comparable and transferable. The key-documents of the ECTS are:

The catalogue of modules and courses / Curriculum

Course catalogues make study programmes easy to understand and compare for all students and staff – local and foreign – and provide them with essential institutional, academic and practical information. It is the regular information for the Executive Master in EU Studies; it is published in English on the [website](#).

The Transcript of Records

The Transcript of Records documents the performance of the students by showing the list of courses taken, the ECTS credits awarded and possibly ECTS grades awarded.

The Master Diploma

CIFE grants to its graduates a Diploma Executive Master in EU Studies signed by its three main experts Prof. András Inotai, Prof. Mattias Wendel and Prof. Wolfgang Wessels, as well as by the Director General of CIFE, Dr Matthias Waechter and the President of CIFE Mr Herman Van Rompuy.

The Diploma Supplement

The Europass Diploma Supplement is issued to graduates of higher education institutions along with their degree or diploma. It helps to ensure that higher education qualifications are easily understood, especially outside the country where they were awarded. The Europass Diploma Supplement was developed jointly with UNESCO and the Council of Europe.

A Diploma Supplement for the Executive Master in EU Studies will be delivered by CIFE together with the Master Diploma.

2. Information on the Executive Master in EU Studies

2.1. General Description

The European Online Academy was initiated in 2003. The Master in EU Studies Online, the first master programme offered by CIFE, has been conducted as a two-year programme since October 2008. Starting in October 2018 CIFE offers the two-year Executive Master in EU Studies online programme for a total of 60 ECTS.

Over the past years European integration has become an even more relevant and complex issue. The European Union is a crucial element of Europe's political architecture, influencing political systems at all levels across Europe. Knowing and understanding the political system of the EU and its policies has become a highly essential part of one's general knowledge of Europe. The programme aims to develop in each student a deeper understanding of European integration and the role and functioning of the EU in a globalised world and within the international context.

The Executive Master in EU Studies offers comprehensive information on recent developments of the European integration process and up-to-date insights into proceedings and policy areas both in the European and international context. The programme facilitates an interdisciplinary approach to relevant issues mainly from political scientists, economists, and European lawyers' perspective. The study programme demands and strongly supports skills developed across different backgrounds and disciplines.

The first year offers a range of compulsory and optional courses in EU history, political science, economics, EU law, lobbying, sustainable development and more.

The second year combines high level teaching in the chosen specialisation with either a research track, leading to a master thesis or a professional track, intensifying skills and competences for the labour market, leading to a final paper.

Throughout the programme, students are taught in research and methodology based on best practices of the academic and professional community. Additionally, the programme offers professional skills and competences training such as a Council summit negotiation and an ECJ simulation, cross-country comparative statistics, policy briefs, economic analyses and legal memos, opinions and writs as well as project management, public speaking, presentation and debate.

These skills and competences are taught within each single course (course inherent), within the module *Skills and Competences* (see 4.3.) and as additional offers during workshops.

These competences include e.g.:

- negotiating within an international context (simulations)
- drafting and presenting of position papers, policy papers and summary reports
- planning, proposing and managing international projects (Project cycle management)
- identifying and trade off of different interests
- thinking and arguing in transnational legal dimensions
- understanding political decision-making procedures on European, national and regional level
- acquiring expertise in working for international and European organisations
- writing press releases and (political) speeches

The e-learning platform, interactive tools like webinars and the intensive presence workshops provide a physical as well as virtual intercultural and multidisciplinary workspace, supporting the development of intercultural competence.

2.2. Target groups

The Executive Master in EU Studies provides a training and additional qualification on Master level for professionals, postgraduates and junior officials interested in or already working in national, European and international organisations, in public or private sector.

2.3. Curriculum and programme overview (1st year)

Courses during the first year

During the first year, i.e. during the first three terms of study, all students are offered a combination of compulsory and optional courses.

In the first term all three courses are compulsory and provide the necessary introductory background relating to the development of the EU system.

The combination of compulsory and optional courses continues in the successive terms and gives the students the opportunity to study specific areas of interest in depth. In order to meet the requirements for completion of the programme and in order to gain the specific academic and competences necessary for the study of the modules of the second year, each student must collect a total of at least 30 ECTS in the

first year, thus complete three courses in the second term and three courses in the third term and participate in and pass the basic course *Fundamentals of Scientific Work*.

A European Council summit simulation is scheduled for one of the workshops, whose participation is also a compulsory element of attendance in the first year of study and is graded.

Course Fundamentals of Scientific Work

All students are expected to participate in the course *Fundamentals of Scientific Work* (see 4.1.1.) which offers an introduction and/or repetition of fundamental skills and competences e.g. how to write an assignment, how to quote and cite properly or how to search for literature. Students have to pass a multiple-choice test and to submit two exercises. The performance of the student will not be graded separately, due to the preparatory or repetitional character of this basic course.

2.4. Curriculum and programme overview (2nd year)

The second year of study combines three advanced compulsory courses and a specialisation phase chosen according to individual interests with the option to either follow a research track, leading to a master thesis, or a professional track to intensify your skills and competences for the labour market, leading to a final paper.

After the successful completion of the three compulsory advanced courses in economics, political science and European law, the students are expected to choose between one of these disciplines and follow either a research track or a professional track. Participation in three advanced courses and in one specialisation is compulsory.

Programme overview second year

2.5. Module over two years: Skills and Competences

Within the module *Skills and Competences*, the students take part in a certain number of lectures, presentations and exercises offered during the presence workshops and complete one compulsory course, either the course *Project Cycle Management and Logical Framework Approach* or the course *Strategic Planning, Evaluation and Implementation of Development Programmes in the EU*.

2.6. Admission requirements and application procedure

The programme is open to applicants of all nationalities who already hold at least a qualification in higher education which meets the European qualification frameworks basic requirements for first cycle qualifications of 180 to 240 credits (i.e. B.A. or equivalent) and English proficiency.

All applicants must complete the online registration form and mail to cife-berlin@cife.eu the following documents:

- The applicant’s Curriculum Vitae
- A description of the applicant’s academic qualifications (diplomas, degrees) and professional experience
- A description of the applicant’s motivation and interest in the Executive Master in EU Studies

The Selection Committee selects the candidates for participation in the programme on the basis of the information provided in the registration form.

2.7. Final examination and assessment regulations for the 1st year

For the successful completion of the first year of the programme, students are expected to:

- A. study the respective online material, participate actively in all courses and submit the respective assignments according to the study regulations (see Study Regulations)
- B. participate in at least three of the four presence workshops
- C. actively participate in the simulation
- D. actively participate in all interactive e-learning modules (e.g. forums, questionnaires, online exercises, etc.)
- E. pass the final written examinations for all the compulsory courses and all the elective courses
- F. study the basic course *Fundamentals of Scientific Work*, pass the multiple-choice test and submit the two exercises.
- G. take actively part in the lectures of the module *Skills and Competences*

2.8. Final examination and assessment regulations for the 2nd year

For the successful completion of the second year of the programme, students are expected to:

- A. study the respective online material and participate actively in all advanced courses and in one specialisation phase (either the research track or the professional track)
- B. submit the required assignments and take part in the moderated fora actively throughout the year according to the study regulations (see Study Regulations)
- C. participate in all four presence workshops
- D. actively participate in all interactive e-learning activities (e.g. forums, quizzes)
- E. pass the final written examinations for the three advanced courses and – if chosen - the exam in the chosen specialisation course of the professional track
- F. take actively part in the methodological classes
- G. submit the required assignments and papers (e.g. outlines, exposés, presentations, research paper according to the chosen track
- H. take actively part in a certain number of teaching sessions online and in-class of the module *Skills and Competences* and complete either the course *Project Cycle Management and Logical Framework Approach* or the course *Strategic Planning, Implementation and Evaluation of Development Programmes in the EU*

2.9. Qualification and ECTS credits awarded

With the successful completion of the programme, students receive a diploma Executive Master in EU Studies.

The credits awarded for the programme add up to 60 corresponding to a workload of 1500 hours/2 years in total.

2.10. Workload

Overview of the ECTS credits distribution over two years:

| | O | N | D | J | F | M | A | M | J | J | A | S | O | N | D | J | F | M | A | M | J | ECTS | |
|--|----|---|---|---|---|---|---|---|---|----|----|----|---|---|---|----|---|---|---|---|---|------|----|
| Month | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 |
| First year | | | | | | | | | | | | | | | | | | | | | | | |

| Elective courses | | | | 9 | | | | | | | | | | | | | | | | | | 9 | |
| Simulation | | | | | | | | | 3 | | | | | | | | | | | | | 3 | |
| Second year | | | | | | | | | | | | | | | | | | | | | | | |
| Skills & Competences (PCM or SPIED) | | | | | | | | | | 3 | | | | | | | | | | | | 3 | |
| AC EU law | | | | | | | | | | 5 | | | | | | | | | | | | 5 | |
| AC Economics | | | | | | | | | | 5 | | | | | | | | | | | | 5 | |
| AC Political Science | | | | | | | | | | 5 | | | | | | | | | | | | 5 | |
| Specialisation phase: Research or Professional Track | | | | | | | | | | | | | | | | 12 | | | | | | 12 | |
| | | | | | | | | | | | | | | | | | | | | | | 60 | |

The credits awarded for the successful completion of the Master programme are 60 ECTS. They are calculated on the basis that one ECTS credit is equivalent to 25 working hours on average. In total 60 ECTS are a workload of 1500 hours.

2.11. Educational and professional goals

The programme is designed primarily as an additional qualification on Master level for professionals, postgraduates and junior officials interested in or already working in national, European or international organisations, who need deepened knowledge in the field of European integration and professional skills and competences.

2.12. ECTS departmental coordinator

For questions concerning ECTS credits contact the programme management at cife-berlin@cife.eu.

3. Academic staff and experts of the Executive Master in EU Studies

The lecturers of the Executive Master in EU Studies are renowned experts in their disciplines with academic and professional background as professors, researchers and advisors. Each course is usually led by a professor and supported by an assistant.

General assistance is offered by the team of the Executive Master in EU Studies, **Aline Palige**, **Camille Raffin** and **Leonore Schäfer**.

Here follows the list and affiliation of the teaching staff of the programme:

Prof. François Bafail – Head of Research of CERI and Science Po (Paris)

Dr Doris Dialer – Attachée | Head of Consumer Affairs & Health, Permanent Representation of Austria to the EU

Mr Emre Gür – BAREM Consultancy & Training (Istanbul) and CIFE

Dr Artur Gruszczak – Jagiellonian University (Krakow)

Dr Rachel Guyet – Research Fellow, CERI-Sciences Po (Paris) and CIFE

Ms Gyöngyvér Gyene – Consultant (Budapest)

Prof. András Inotai - Institute for World Economics (Budapest)

Mr Ralf Kanitz- German Federal Ministry for Economic Affairs and Energy (Berlin)

Mr Kai Kraus – Free University Berlin, Faculty of Law (Berlin)

Dr Robert Kissack – Head of Studies, Institut Barcelona d’Estudis Internacionals (IBEI - Barcelona)

Dr Birgit Bujard – Centre for Turkey and European Union Studies (CETEUS), University of Cologne

Prof. Jacques Le Cacheux - Université de Pau et Science Po (Paris)

Mr Edgar Lenski – German Federal Chancellery (Berlin) and Research Fellow, Walter Hallstein Institute, Humboldt University Berlin

Dr Mazhar Mughal – Groupe ESC, Université de Pau

Ms Sarah Sporys – Doctoral candidate University of Freiburg and Research Associate German Historical Museum, Berlin

Dr Tamás Szigetvári – Institute for World Economics (Budapest) and Pázmány Péter Catholic University (Budapest)

Mr Thomas Traguth – MA (oxon), MA (College of Europe)

Dr Matthias Waechter – Director General, CIFE (Nice/Berlin)

Prof. Mattias Wendel – University of Leipzig, Faculty of Law

Prof. Wolfgang Wessels – Jean Monnet Chairholder *ad personam*, CETEUS, University of Cologne

4. Description of courses & modules of the Executive Master in EU Studies

4.1. First year

4.1.1. Fundamentals of Scientific Work

The course Fundamentals of Scientific Work offers an introduction to and repetition of fundamental academic skills/competences, e.g. how to write an assignment, how to quote and cite properly or how to search for open-access academic literature. Students have to pass a multiple-choice test (1st term) and to submit two exercises (2nd term). While the individual performances will not be graded, the successful accomplishment of all three deliverables is necessary to pass the course as a whole.

October – June (first year)

| | |
|-------------------------|--|
| Theme/Topic | Fundamentals of Scientific Work |
| Expert: | Ms Sarah Sporys , Doctoral candidate University of Freiburg and Research Associate German Historical Museum, Berlin |
| Character: | Compulsory (introduction), repetition of fundamental prerequisites; preparatory course |
| ECTS credits: | No grading /repetition of prerequisites |
| Teaching methods: | Lecture with in-class discussion, course material, intensive self-studying |
| Skills and competences: | Essay writing, searching for academic literature, proper referencing, avoiding plagiarism, structuring a master thesis in social sciences. |

Learning outcomes: Repetition and consolidation of academic skills: How to approach an exam/assignment? How to conduct research in social sciences? How to reference properly? How to write an academic essay/thesis?

4.1.2. Institutional Architecture of the EU

Theme/Topic: The institutional architecture of the EU ‘after Lisbon’ – Fit for the next decade?

Experts: **Prof. Wolfgang Wessels**, Jean Monnet Chairholder ad personam, CETEUS, University of Cologne and **Dr Birgit Bujard**, Academic Assistant

Character: Compulsory

ECTS Credits: 3 ECTS credits

Teaching methods: Seminar and discussion at the presence workshop, interactive course text, learning videos, guided forum, webinars

Assessment methods: Final exam at the end of the term, assignments, active participation in workshop and forum discussion

Skills and competences: EU policy making in its institutional context; applying theoretical/analytical tools to conceptualise the EU’s functioning; handling of EU primary documents; filtering and interpreting these information properly.

Objective and course content:

The course focuses on the explanation of the institutional architecture of the EU in the light of current challenges, providing in-depth insights on the Union’s institutions and decision-making procedures from a ‘legal’ and a ‘living perspective’. Both the institutions’ internal functioning as well as their interaction in the EU’s political system will be analysed. In addition, future scenarios of EU governance and integration for the decade 2020-30 will be discussed in light of the experiences with the Treaty of Lisbon (2009) so far. For all topics, starting points for further research will be integrated in the interactive course text.

4.1.3. History of European Integration

Theme/Topic: History of European Integration

Expert: **Dr Matthias Waechter**, Director General, CIFE

Character: Compulsory

ECTS Credits: 3 ECTS credits

Teaching methods: Lecture, seminar and discussion at the presence workshop, guided forum

Assessment methods: Final exam at the end of the term, assignments, active participation in workshop and forum discussion

Skills and competences: Capacity to use history as a source for understanding current problems, working with historical sources. Comprehending European integration as a step-by-step process.

Objective and course content:

Students receive a general vision of historical factors shaping European integration in the cold war period of international relations and after 1989 in the period of globalization. By the end of the course they are able to distinguish between different eras of the integration process and know their main characteristics and dynamics. The course is intended to frame a set of structural and historical patterns which can explain the integration dynamics and its stagnation, factors related to internal (functional) as well as external (competition with superpowers and nation states) constraints. Students will understand the relation between enlargement of the European Union and the internal processes of deepening of intra-state cooperation and supranational decision-making. The course helps students to better assess the arguments of opponents of European integration and to place them into their historical context. Also, students will be able to use historical inquiry in order to validate or disprove the different theories of European integration.

Bibliographical advice and links:

Universiteit Leiden, *History of European Integration*: <http://www.history.leidenuniv.nl> (last access 04.09.2019)

4.1.4. Introduction to European Law

Theme/Topic: European Law I – Basics of European (Constitutional) Law

Experts: **Mr Edgar Lenski**, German Federal Chancellery) and Research Fellow, Walter Hallstein Institute, Humboldt University Berlin
Assistant: Mr Kai Kraus, Free University Berlin

Character: Compulsory

ECTS Credits: 3 ECTS credits

Teaching methods: Lecture, seminar and discussion at the presence workshops, guided forum

Assessment methods: Final exam at the end of the term, assignments, active participation in workshop and forum discussion

Skills and competences: Legal terminology, legal arguing, reading and understanding cases and judgments, thinking and arguing in transnational legal dimensions

Objective and course content:

Introduction into European Constitutional Law in general: Treaties or Constitution?, the autonomy of European law, its relationship to national (constitutional) law, multilevel constitutionalism and the EU divided-power system, competences of the EU, institutions, decision-making procedures, legislative acts, in particular directives and their direct effect, methods and problems of implementation, liability of Member States for infringements, fundamental rights and the system of legal protection by national courts and the ECJ.

4.1.5. European Law II

| | |
|-------------------------|--|
| Theme/Topic: | European Law II – Internal market |
| Experts: | Mr Edgar Lenski , German Federal Chancellery and Research Fellow, Walter Hallstein Institute, Humboldt University Berlin Assistant: Mr Kai Kraus , Free University Berlin |
| Character: | Compulsory |
| ECTS Credits: | 3 ECTS credits |
| Teaching methods: | Lecture, seminar and discussion at the presence workshop, guided forum |
| Assessment methods: | Final exam at the end of the term, assignments, active participation in workshop and forum discussion |
| Skills and competences: | Legal terminology, legal arguing, reading and understanding cases and judgments, thinking and arguing in transnational legal dimensions |

Objective and course content:

Based on the introductory course on European Constitutional Law, this course aims at a more precise understanding of EU substantive law: the internal market and the competition rules. Each of the chapters on the four freedoms, on gender equality, on harmonisation of laws, on competition law and on public procurement law, starts out with a detailed introduction. These introductory chapters are followed by a study of the ECJ's case law: after reading and analysing the leading cases, the students will finally approach the recent jurisprudence of the Court relating to the aforementioned topics.

Bibliographical advice

For EU-Legislation and ECJ case law: <http://eur-lex.europa.eu/en/index.htm>

4.1.6. Political Economy of Energy Transitions

| | |
|-------------------|--|
| Theme/Topic: | Political Economy of Energy Transitions |
| Expert: | Prof. François Bafoil , CERI Paris Dr Rachel Guyet , CERI Paris |
| Character: | Optional |
| ECTS Credits: | 3 ECTS credits |
| Teaching methods: | Lecture, seminar and discussion at the presence workshop, guided forum |

- Assessment methods: Final exam at the end of the term, assignments, active participation in workshop and forum discussion
- Skills and competences: Gaining a broad understanding of the political economy of energy transitions in Europe and in the world

Objective and course content:

4 parts:

History

Overview of the development of energy systems over the last two centuries in Europe and in the world.

Determinants

Three main dimensions of the field of the political economy of energy are going to be analysed:

1. how the demographic evolutions impact the energy demand
2. how urbanisation, industrialisation, mobility and consumption practices contribute to the climate crisis
3. how the energy transitions and resources can address the energy and climate challenges together

Resources and conflicts

Some major energy conflicts in Europe and its neighbourhood are going to be analysed.

Organisations and regulation

This chapter explores how energy transitions transform and are transformed by international and European institutions as well as by the State and the market.

 Smil V., (2017). *Energy and Civilization. A History*, Cambridge: MIT Press

4.1.7. The EU in World Politics

- Theme/Topic: The EU in World Politics
- Expert: **Dr Robert Kissack**, Institut Barcelona d'Estudis Internacionals (IBEI)
- Character: Compulsory
- ECTS Credits: 3 ECTS credits
- Teaching methods: Lecture, seminar and discussion at the presence workshop, guided forum
- Assessment methods: Final exam at the end of the term, assignments, active participation in workshop and forum discussion
- Skills and competences: Critical analysis, essay writing, small and large working groups (Assessment methods). A thorough understanding of the theoretical and practical dimensions of foreign policy making in the contemporary world, with reference to the European Union and its member states. An introduction to the social science discipline of International Relations.

Objective and course content:

This course is intended to provide a thorough understanding of European foreign policy in global dimension; its historical evolution, its current structure, and the key objectives it promotes. More specifically, the course is based in the social science discipline of International Relations, which focuses on the behaviour of states (and, of course, *sui generis* actors like the EU) in international politics. The web content provides the student with an overview of what IR is about and how it approaches the study of the world, and goes on to focus on foreign policy analysis, which was the traditional approach to the study of the EU. It then moves on to cover more recent developments of specific theories of EU foreign policy, as well as the institutional design and the role of the major EU actors in shaping EU foreign policy. Finally, the course explores EU relations with three major powers in the world: the US, China and Russia.

4.1.8. The Economic Dimension of EU Integration

| | |
|-------------------------|---|
| Theme/Topic: | The Economic Dimension of EU Integration: European Economic and Monetary Union, Stability and Growth Pact, CAP, Climate policies |
| Experts: | Prof. Jacques Le Cacheux , UPPA and Sciences Po Paris Dr Mazhar Mughal , Pau Business School |
| Character: | Optional |
| ECTS Credits: | 3 ECTS credits |
| Teaching methods: | Lecture, seminar and discussion at the presence workshop, guided forum |
| Assessment methods: | Final exam at the end of the term, assignments, active participation in workshop and forum discussion |
| Skills and competences: | Working with and evaluating statistical material, exploring and discussion macroeconomic dimensions, analytical skills in applied economics |

Objective and course content:

The course is designed in such a way as to mobilize major analytical tools of economics to enlighten the various aspects of EU economic integration under the challenge of international global developments and the processes of economic policymaking in the EU. It covers market integration, competition policy and their consequences, macroeconomic policies (monetary and fiscal) in the Eurozone, tax and social competition, climate policies, etc.

The objectives of the course are to allow an understanding of major issues, problems, challenges and policy choices facing policymakers in the EU, while acquiring analytical skills in applied economics.

4.1.9. The Enlargement of the EU - Experiences, Processes and Impact

| | |
|-------------------------|--|
| Theme/Topic: | Enlargement of the EU - Experiences, processes and impact |
| Experts: | Prof. András Inotai , Institute for World Economics (Budapest) Dr Tamás Szigetvári , idem & Pázmány Peter Catholic University |
| Character: | Compulsory |
| ECTS Credits: | 3 ECTS credits |
| Teaching methods: | Lecture, seminar and discussion at the presence workshop |
| Assessment methods: | final exam at the end of the term, assignments, active participation in workshop and forum discussion |
| Skills and competences: | Working with and evaluating of short-, medium- and longer-term development trends based on official documents, statistics, policy papers, exploring and discussing macroeconomic dimensions, and developing analytical skills by comparing original goals and instruments (expectations) with real performance (implementation). |

Objective and course content:

The course includes four main topics:

- (a) process of and experience with Eastern enlargement of the EU (2004 and 2007),
- (b) lessons for candidate countries and countries of the Eastern Partnership,
- (c) the current state of further enlargement (Western Balkan countries and Turkey), including ongoing accession negotiations
- (d) impact of enlargement on the European Union

In this framework, a pragmatic and policy-oriented approach will highlight how to negotiate the individual chapters, with special reference to the most difficult ones. In addition, the constant and changing interest of the enlarged EU in widening (and deepening) will be addressed.

4.1.10. Justice and Home Affairs in the EU

| | |
|-------------------------|---|
| Theme/Topic: | Justice and Home Affairs in the EU |
| Expert: | Prof. Artur Gruszczak , Jagiellonian University, Krakow |
| Character: | Optional |
| ECTS Credits: | 3 ECTS credits |
| Teaching methods: | Lecture, seminar and discussion at the presence workshop, guided forum |
| Assessment methods: | Final exam at the end of the term, 1 assignment (an essay), active participation in the workshop and forum discussion |
| Skills and competences: | <ul style="list-style-type: none"> • ability to understand and assess the global key aspects of the JHA policies • ability to identify and examine international policy context • analytical and research skills and critical thinking |

Objective and course content

Justice and Home Affairs (JHA) is an expanding field of EU integration. Purely intergovernmental until the entry into force of the Amsterdam Treaty, it has been gradually shifting towards the community policy encountering many obstacles and limitations. JHA policies have evolved along two main axes of tension in this field: intergovernmental versus community policy-making; internal versus external dimension. Transformed into an Area of Freedom, Security and Justice in the Amsterdam Treaty, JHA issues blended the vital state prerogatives, in such areas as internal security, border control and criminal justice, with supranational regulations of EU citizenship, protection of freedoms and rights of EU citizens, asylum and judicial cooperation in civil and commercial matters.

The evolution of JHA from sidelined policy area at the times of the Maastricht Treaty into the focal yet contested field of EU integration in the aftermath of the Lisbon Treaty is a story of a slow progress and many reverse turns. The reason is that the governments have tried to upload their security concerns on the EU agenda, while jealously defending their prerogatives. It is also the story of an increasingly active EU foreign policy agenda, which resulted in placing the Area of Freedom, Security and Justice in a global context and inevitably linking it to cooperation with outside actors. Migration and refugee problems, which culminated in the years 2015-2016, have proven complexity of the external/internal dimension of JHA policy. They also generated new tensions undermining remarkable integration achievements, such as the Schengen area or, to a large extent, the Common European Asylum System.

This course will analyse the institutional and legal framework of JHA policies and examine the aspects of practical cooperation. Special attention will be paid to international dimension and global aspects of these policies. Migration issues, border management, law-enforcement collaboration and judicial cooperation are the most notable aspects of JHA and will be discussed in great detail throughout the entire course.

4.1.11. Lobbying and Advocacy in the EU

| | |
|-------------------------|---|
| Theme/Topic: | Lobbying and Advocacy in the EU |
| Expert: | Dr Doris Dialer , Attachée Head of Consumer Affairs & Health, Permanent Representation of Austria to the EU |
| Character: | Optional |
| ECTS Credits: | 3 ECTS credits |
| Teaching methods: | Virtual/physical lecture, role play, storytelling, guided discussion forum, documented problem solving |
| Assessment methods: | Active participation, feedback-based learning, short assignments (e.g. case study analyses, transparency register findings), final exam |
| Skills and competences: | <ul style="list-style-type: none"> • argumentation, presenting expertise (e.g. position paper), policy and process competence, stakeholder identification (EU WhoisWho Directory), lobbyist's tool-kit knowledge, agenda setting and issue management, transparency register knowledge, codes of conduct, dynamics and trends (e.g. digital lobbying, health advocacy, greenwashing) |

Objective and course content:

Lobbyists have been termed the “fifth power” (after the executive, legislative, judiciary branches, and the media). Yet, the constant “scandalization” led to numerous lobbying myths, which the course intends to unpack. Lobbying is marked by a legitimate exchange logic, where “access” to decision-makers is gained by providing expertise. In terms of means and financial resources, the differences between NGOs (advocates) and corporate business (lobbyists), to which for instance the car, banking, pharma or digital industry are counted, raises constant concerns whether interests are represented on an equal footing. Yet, one of the vital questions is what kind of strategies and techniques lobbyists and advocates are using to reach their goals? Given the complexity of the EU institutional setting and law-making process, policy as well as procedural competence is needed to survive in the so-called shark filled “Brussels bubble”.

Since the course focuses on a practical approach, insight-knowledge and case studies will support the key content:

1. General Introduction: theory, terminology, differentiation (consultant, public affairs agencies, law firm, think tank), lobbying as a profession, cleavage between EU and the US, funding, in-house lobbying, regional lobbying...
2. Policy & Procedural competence: policies, work programme of the EU Commission, legislative monitoring, identifying specific legislative proposals, understanding a procedure files, ...
3. Institutional Setting: Identifying stakeholders, interacting with civil servants (EU WhoisWho Directory), approaching the right Members of Parliament and their staff (Accredited Parliamentary Assistants)
4. Strategies & Instruments: participating in consultations, coalition building, grass-roots lobbying, inside vs outside lobbying, communication instruments, establishing and keeping contacts, awareness creation (social media tools)
5. Scandalization, Transparency, Regulation & Ethics: codes of conduct, conflict of interest, transparency, ethics, bribery vs misconduct,
6. Dynamics & Trends: changes after Brexit, policy field dynamics (e.g. health lobbying post-Covid 19), professionalization, digitalization, green transition (“greenwashing”), ...

4.1.12. Sustainable Development Policy and the European Green Deal

| | |
|-------------------------|--|
| Theme/Topic: | Sustainable Development Policy and the European Green Deal |
| Expert: | Ms Gyöngyvér Gyene , Consultant |
| Character: | Optional |
| ECTS Credits: | 3 ECTS credits |
| Teaching methods: | Lecture, seminar and discussion at the presence workshop, guided forum |
| Assessment methods: | Final exam at the end of the term, assignments, active participation in workshop and forum discussion |
| Skills and competences: | Current sustainability and climate change issues and institutions, presentation and debating skills, fundamentals of writing policy briefs |

Objective and course content:

Course content covers sustainable development policy in Europe, explained against a background of global sustainability trends, focussing primarily on the European Green Deal, the leading policy package aimed at addressing sustainability issues at the European level, as well as a brief review of the key documents featuring sustainable development over the past decades. (Treaty of Amsterdam, 1997: „environmental protection requirements must be integrated into the definition and implementation of the Community policies and activities”; the first Europe-wide sustainable development strategy, adopted in 2001; sustainable development objectives in the Lisbon Treaty in 2009; EU contribution to the United Nations 2030 Agenda for Sustainable Development, “Transforming our world”, and subsequent member state SD strategies).

The European Green Deal, published in 2019, sets the ambitious objective of transforming the EU into a fair and prosperous society, with a modern, resource-efficient and competitive economy. We discuss key objectives and related documents covering the wide range of issues included in the Green Deal: no net emissions of greenhouse gases in 2050; economic growth decoupled from resource use; protect, conserve and enhance the EU's natural capital, and the health and well-being of citizens from environment-related risks and impacts, just and inclusive society, leading international efforts and building alliances with the like-minded, maintaining security of supply and competitiveness.

The course discusses these developments under the following main headings:

1. Sustainability – an emerging global vision
2. Milestones of global sustainable development policy
3. Overview of sustainable development policy in the EU: overarching and competing objectives
4. The European Green Deal
5. The efficacy of policy tools in implementing the objectives of sustainable development in the EU

4.1.13. Simulation

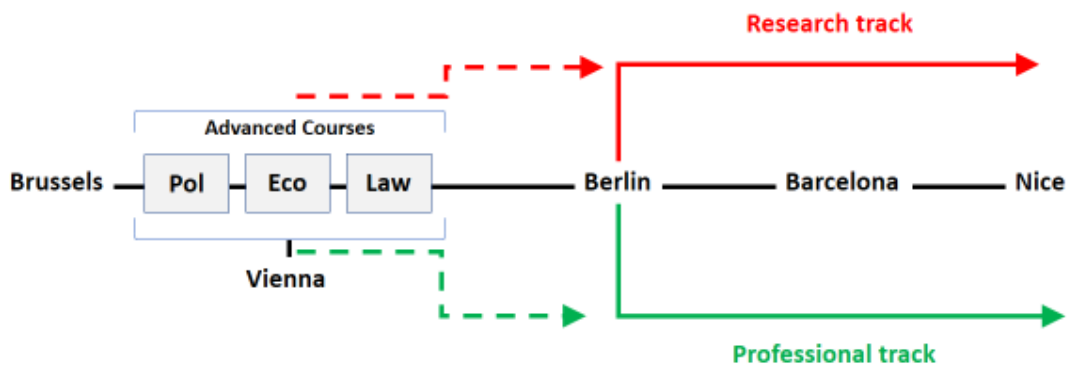

| | |
|-------------------------|---|
| Theme/Topic: | A Summit of the European Council |
| Expert: | Planpolitik |
| Character: | Compulsory |
| ECTS Credits: | 3 ECTS credits |
| Teaching methods: | Online preparation of position papers, working groups, simulation |
| Assessment methods: | Online preparation and submission of tasks before the simulation, active participation during the simulation and final assessment after the simulation |
| Skills and competences: | Negotiation skills, group work, problem solving, presentation, skills in identifying and trade off of different interests, synthesis, critical appraisal, content summation, composing argumentative pieces of writing and distinguishing between emotional and factual presentation, press releases, interviewing method |

4.2. Second year

The second year consists of two phases:

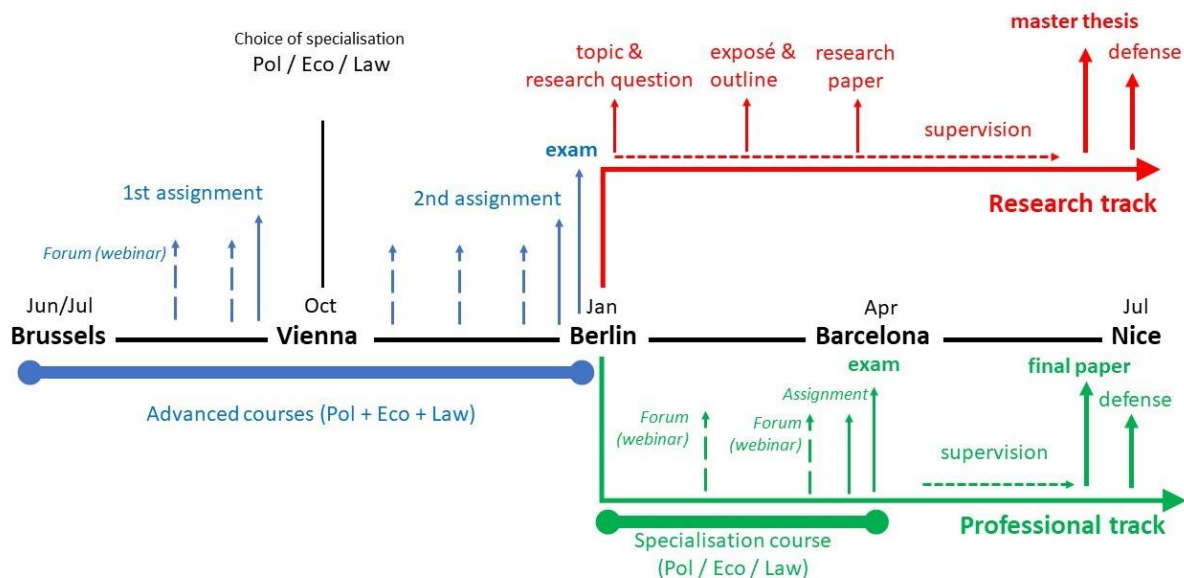

- The first phase with three advanced courses in European Law, Political sciences and Economics
- The second phase with a specialisation phase in either a professional track or a research track

The advanced courses aim at deepening the insights and enhancing the knowledge already acquired. Participation in all three advanced courses is compulsory. During the specialisation phase, students chose one discipline and acquire knowledge in one special field of interest. Within the specialisation phase in either European Law, Political science or Economics, students chose either for a research track, leading to a master thesis or a professional track, intensifying skills and competences for the labour market leading to a final paper.

Throughout all courses and phases the programme teaches research and methodology based on best practices either of the academic or the professional community. Methodological classes, skills and competences training (such as ECJ simulation, cross-country comparative statistics, policy briefs, economic analyses and legal memos, opinions and writs as well as project management, public speaking, presentation and debate) are inherent part of all courses and tracks.

Requirements for the Advanced courses and the Specialisation phase.

4.2.1. Advanced courses

All three advanced courses are compulsory for the students. After the study of these courses, they can decide on their specialisation.

Advanced course European law (compulsory) – 5 ECTS

| | |
|-------------------------|---|
| Theme/Topic: | Constitutional Framework of the EU, European Citizenship and EU Fundamental Rights |
| Experts: | Prof. Dr Mattias Wendel , Faculty of Law, University of Leipzig Mr Ralf Kanitz , German Federal Ministry for Economic Affairs and Energy Assistant: Mr Kai Kraus , Free University Berlin |
| Character: | Compulsory/Advanced course |
| ECTS Credits: | 5 ECTS |
| Teaching methods: | Course material online, methodological session introducing the students into the particularities of ECJ judgments and EU legal texts (“guided reading”), further methodological sessions, seminars on special topics at the presence workshops, guided forum, simulation of the proceedings before the European Court of Justice*, monthly webinars, webcasts, videos |
| Assessment methods: | Graded final exam at the end of the term (January), two graded assignments (of which one is part of the simulation), evaluation of active participation during the workshops and answers/contributions to questions posted in the forum |
| Skills and competences: | Legal analysis, reasoning and arguing, writing a legal memo, introduction into the proceedings before the ECJ, in-depth study of some core issues of EU law |

Learning outcomes, methods and course content:

The course focuses at the deepening of the understanding of the EU and its constitutional setting and law from the citizens’ perspective. Since the Treaty of Maastricht, the concept of EU citizenship has not only evolved to a central basis of the Union, but also encompasses meaningful political, economic and social rights as recognized by the ECJ. Master students will carry out in-depth analyses of five topics, based upon the introduction completed in the first year. These subjects range from constitutional/structural questions, such as the citizens’ constitutional and political status in the EU, citizens’ rights and obligations in the relationship between national and European (constitutional) law, the individuals’ fundamental rights and her freedoms in the internal market, including social rights of migrant workers and other EU-citizens making use of their right of free movement. Relevant case-law of the ECJ will be discussed in more detail.

*** Simulation –Description**

| | |
|-------------------------|---|
| European Law: | A case to be discussed before the <u>ECJ</u> |
| Expert: | Mr Ralf Kanitz |
| Character: | Participation is a compulsory part of the advanced course <ul style="list-style-type: none"> • students specializing in European law will write a legal writ, the Advocate General’s Conclusions, or the Court’s judgement and will simulate an oral hearing before the Court • students not specializing in European law will write a legal memo |
| ECTS credits: | Part of the ECTS awarded for the advanced course |
| Teaching methods: | Introduction by expert, presentation of results (legal writs, legal memos) by students, simulation of oral hearing |
| Assessment methods: | Evaluation of the assignments, the discussion and performance during the simulation |
| Skills and competences: | Pleading skills, legal arguing, applying legal knowledge to a specific case, learning how to write a legal writ/memo |

Objective and content of simulation:

The idea of the simulation is to make students familiar with the practical application of European law. A case pending before the General Court or the ECJ will be the basis. Each student will take the role of one of the parties who are involved in this case in reality: The applicant, the defendant, institutions (EP, Council, and Commission), national governments, the advocate general, the judges (judge rapporteur). A minimum of three students is required. Students will submit their written observation, application, defense, or report. On that basis, the group will simulate the hearing of the Court, including the pleadings of the parties, and questions by the judges and the advocate general to the parties. The Court will reconvene after a break to hear the opinion of the advocate general. During another break, the Court will deliberate in order to give and explain its judgment in a final session. After that, the judgment, including the reasoning, will be drafted and possibly published on the website of the Executive Master Programme (for comparison with the judgment of the ECJ in the “real” case).

Advanced course Economics (compulsory) – 5 ECTS

| | |
|-------------------|--|
| Theme/Topic: | The European Union facing global economic challenges |
| Experts: | Prof. András Inotai , Institute for World Economics (Budapest) Dr Tamás Szigetvári , idem & Pázmány Peter Catholic University |
| Character: | Compulsory, Advanced Course |
| ECTS Credits: | 5 ECTS |
| Teaching methods: | Lecture and course material online, seminar and discussion at workshops, guided forum; For those who specialize in Economics: methodological classes during the workshops, interdisciplinary |

presentation and discussions during workshops; (debating society exercise together with Political Sciences)

Assessment methods: final exam at the end of the term (January), two assignments, active participation in workshops and forum discussions, methodological classes,

Skills and competences: policy-oriented assessment of the interdependence between and mutual impact of global economic trends and developments of the EU, interdisciplinary approach, methods of academic research and writing, developing practical economic policy approaches, writing policy briefs, open discussion of key issues (to be identified according to specific current issues)

Learning outcomes, methods and course content:

The course deals with some core elements of the EU's global presence

- (a) the EU as a global trader, its position and trade policy
- (b) the EU in global capital flows and European TNCs
- (c) the EU's global competitiveness (traditional and new factors of competitiveness)
- (d) the role of euro in a globalized economy
- (e) the EU and international development assistance

The interdisciplinary character of all subjects will be continuously highlighted.

Students acquainted with key global economic trends and the EU's position in the world economy, including Europe's strong and weak factors, between the external factors challenging the EU and the internal developments, both as a response to external impacts and as a key player influencing global economic trends.

The methodology is based on comparative and policy-oriented approach that enables the students to understand and analyse macroeconomic statistics, identify fundamental economic challenges and different policy responses in global and European context.

The economy-focused but interdisciplinary character of the course is considered to be a relevant input for an active and fruitful discussion with students specialised in political and/or legal issues.

Góralczyk, Bogdan J. (ed., 2015), *European Union on the global scene: United or irrelevant?* Centre for Europe, University of Warsaw, 278 pp.

Advanced course Political Science (compulsory) – 5 ECTS

| | |
|---------------------|---|
| Topic: | Explaining the institutional evolution of the EU: Drivers and Barriers |
| Experts: | Prof. Wolfgang Wessels , University of Cologne, Jean Monnet Chair ad personam / CETEUS Mr Thomas Traguth , MA (oxon), MA (College of Europe) |
| Character: | Compulsory, Advanced Course |
| ECTS-Credits: | 5 ECTS |
| Teaching methods: | Lecture and course material online, seminar and discussion at the presence workshops, webinars, guided forum |
| Assessment methods: | Final exam at the end of the term, two assignments, active participation in workshop and forum discussion |

- Skills and competences:
- Students will:
- study the major theories of EU integration
 - examine the key drivers and barriers of EU institutional evolution
 - develop competing explanations for the dynamics of development
 - compare different scenarios of further EU integration
 - explain complexity and differentiation in the EU
 - evaluate different strategies for EU development

More generally, students will:

- refine their methods of academic research and writing, develop practical policy strategies in a policy brief
- take part in a formal debating exercise (together with Economics)

Learning outcomes, methods and course content:

The EU institutional system has been shaped by major event and forces, such as strategic political decision-making, responses to unexpected crises as well as continuous incremental adaptations for more than 60 years. This course builds on the knowledge of the EU institutional architecture provided by the first year of the programme. In this follow-up, students will look for the key driving (and restraining) forces of the EU’s institutional evolution. Students learn to identify, analyze and explain “milestones” and “watersheds” in EU history by applying the major theories and approaches of EU integration. They will be able to identify the fundamental patterns of how and why the political system of the European Union has been shaped by its drivers and barriers.

The course will introduce the most influential theories and approaches to explaining the EU, namely

- (Neo-) Federalism,
- (Neo-) Realism / Intergovernmentalism and
- (Neo-) Functionalism
- and newer approaches, e.g. neo-institutionalism.

With these conceptual tools, students will be equipped to develop competing explanations for the dynamics, driving and limiting forces of this change and possible scenarios for the future. They will further compare and evaluate the different strategies for the EU’s future.

The course contents are structured in such a way to make these different perspectives comparable and their application interchangeable. Students will thus develop academic rigour in small working groups, oral presentations, written assignments including the drafting of a policy brief, participating in debate and intensive discussions with their peers and the professors of the programme. These transferrable skills are useful in the EU-related labour market and contribute to improving employability prospects in this field.

Eilstrup-Sangiovanni, Mette (2006): *Debates About European Integration. A Reader*. Houndmills: Palgrave Macmillan.

4.2.2. Specialisation phase

Students choose one specialisation (European law, Economics or Political Science) and follow either a research track, leading to a master thesis, or a professional track, intensifying skills and competences for the labour market, leading to a final paper. 12 ECTS in total is counted for the whole specialisation phase, including master thesis/final paper.

Specialisation phase European law – 12 ECTS

1. Professional track

| | |
|--------------------------|--|
| Topic of specialisation: | Internal Market, Trade and Sustainability (Aspects of internal market law in an international perspective) |
| Expert: | Mr Ralf Kanitz , German Federal Ministry for Economic Affairs and Energy Assistant: Mr Kai Kraus , Free University Berlin |
| Character: | Specialization course, focusing on improving professional skills, writing of an assignment and a final paper |
| ECTS Credits: | 12 ECTS |
| Teaching methods: | Course material and readings online, moderated forum, webinars, methodological classes during the workshops, interdisciplinary presentation and discussions during workshops |
| Assessment methods: | Graded final exam taken in March/April at the third workshop, graded assignment, graded final paper, evaluation of presentation of assignment (legal briefing) at the third workshop and of presentation of the final paper at the fourth workshop, evaluation of active participation during the workshops and answers/contributions to questions posted in the forum |

Skills and competences: Interdisciplinary thinking and understanding, professional skills and competences with regard to the course content, writing of a comprehensive legal memo/opinion, briefing and presentation skills

Learning outcomes, methods and course content:

The specialization course (professional track) will take a more interdisciplinary perspective, with the aim to prepare the students for writing the final paper. Internal market, trade and sustainability is the topical framework that will be approached by an in-depth study of the case law on the free movement of goods within the EU as compared to the GATT. This includes the substantial provisions of the two regimes, and also a comparative analysis of the rules of judicial enforcement, i.e. ECJ and WTO dispute settlement procedures. Environmental protection law and policies are an example for the need of a balance among free trade and other values, and this again plays an important role in the EU as well as at the WTO.

Though EU law will be the point of departure in this course, economics and political sciences will be integrated into the programme in order to ensure a productive interdisciplinary discussion, as the basis for the final paper to be written in this area.

2. Research track

Topic of specialisation: Individual chosen research topic

Expert: **Prof. Mattias Wendel**, Faculty of Law, University of Leipzig

Character: Individual research within the chosen specialisation

ECTS Credits: 12 ECTS

Teaching methods: Intense individual supervision on a research topic, methodological classes during the workshops; interdisciplinary presentation and discussion of research paper & research colloquium at the third workshop

Assessment methods: Graded research paper, graded master thesis, evaluation of presentation and discussion of research paper, and of defense of master thesis

Skills and competences: Research skills and competences (How to find a research question? How to write a research paper? How to write a master thesis?), interdisciplinary thinking and understanding, law in context, requirements and methods of innovative research, writing a master thesis

Learning outcomes, methods and course content:

Students of the research track may choose a legal research topic of their liking. Experience shows that some students already have a topic, often related to their job or career opportunities. In this case, supervisors will help to formulate the research question and continuously guide the students in their work. Students who do not yet have a research topic may discuss possible options with the supervisors. Though the research should have a legal focus, economics and political sciences can be integrated into the master thesis.

Specialisation phase Economics – 12 ECTS
1. Professional Track

| | |
|--------------------------|--|
| Topic of specialization: | Cohesion and differentiation - internal cohesion of the EU |
| Experts: | Prof. András Inotai , Institute for World Economics (Budapest) Dr Tamás Szigetvári , idem & Pázmány Peter Catholic University |
| Character: | Specialisation Course within professional track ECO, focusing on improving professional skills, writing of an assignment and a final paper |
| ECTS Credits: | 12 ECTS |
| Teaching methods: | Lecture and course material online, seminar and discussion at workshops, guided forum; For those who write their final paper in this module: methodological class during the workshops, interdisciplinary presentation and discussions during workshops |
| Assessment methods: | Final exam (specialization course content) at the end of the term, assignments, active participation in workshops and in a discussion session; presentation of drafts of the final paper, forum discussions, methodology seminar, final paper |
| Skills and competences: | How to write a final paper? Policy-oriented assessment of the interdependence between and mutual impact of global economic trends and developments of the EU, interdisciplinary approach, professional oriented skills and competences, developing practical economic policy approaches, writing policy briefs and short economic analysis, open discussion of key issues (to be identified according to specific current issues), writing and presenting a final paper. |

Learning outcomes, methods and course content:

Contents:

- (a) The upgrading of economic security (mainly energy, migration and environment)
- (b) Internal factors of cohesion and differentiation (economic divergences, different impact of external factors on member countries, emerging nationalism and anti-EU movements, the necessity of two-way solidarity)
- (c) Consequences and management of a multi-speed EU: towards disintegration or a qualitative leap forward towards deepening the integration?

Assessment methods and skills and competences as above.

The interdisciplinary character of all subjects is continuously highlighted, thus creating an excellent basis is created for discussion with the topics of the political and legal courses.

Students are made acquainted with critical external and internal challenges of the European integration. On the one hand, external economic security challenges will be addressed and discussed. On the other hand, internal threats of cohesion (different member country priorities, undermining of key European values, nationalistic trends) will be dealt with in the context of how or whether to manage the critical mass of cohesion in a multi-speed European Union.

2. Research track

| | |
|--------------------------|--|
| Topic of Specialisation: | Individual chosen research topic |
| Experts: | Prof. András Inotai , Institute for World Economics (Budapest) Dr Tamás Szigetvári , idem & Pázmány Peter Catholic University |
| Character: | Individual research work within the chosen specialisation Economics |
| ECTS Credits: | 12 ECTS |
| Teaching methods: | Intensive supervision on a research topic, readings and individual supervision, moderated forum, webinars, methodological class during the workshops, interdisciplinary presentation and discussions during workshops, research colloquium during the seventh workshop |
| Assessment methods: | Exposé, outline, table of content, research paper (leading to a master thesis), discussion during the third workshop of the second year, defense of the master thesis at the final fourth workshop |
| Skills and competences: | How to find a research question? How to write a research paper? Interdisciplinary thinking and understanding, scientific skills and competences with regard to one special research topic; requirements and methods of innovative research. Sensibility for the integration of theory and practice in EU-studies, writing and presenting an own research paper, writing a master thesis. |

Learning outcome and objectives

Students who have chosen the research track learn how to do own research work in the field of economics. They are expected to work on their own research questions and apply economic methods and methodology. Students interested in research work will be supported in developing competences in policy-oriented assessments of global economic trends. The master thesis has to be written in accordance to all academic standards and has to be defended during a final presence workshop.

Specialisation Phase Political Science - 12 ECTS

1. Professional Track

| | |
|--------------------------|--|
| Topic of specialisation: | <p>Formats of professional practice – Working in the EU political arena.</p> <p>Students apply practical skills – both written and oral – needed in a professional environment such as international and national administrations, NGOs, lobbies and think tanks</p> |
| Experts: | <p>Prof. Wolfgang Wessels, University of Cologne (Jean Monnet Chair ad personam / CETEUS)</p> <p>Mr Thomas Traguth, MA (oxon), MA (College of Europe)</p> |
| Character: | Specialisation course within the professional track, focusing on improving professional skills, writing of an assignment and a final paper |
| ECTS-Credits: | 12 ECTS |
| Teaching methods: | Lectures and online course material, seminar and discussion at the presence workshops, guided forum, webinars. |
| Assessment methods: | <ul style="list-style-type: none"> • Written assignments (e.g. press release, policy brief, one pager, scenario building, group paper) • active participation in presence workshops. • regular (short) written contribution to the moderated forum discussion • methodology seminar with own presentation and development of professional skills • oral presentation of the third assignment • presentation of own final paper in the form of SWOT analyses, policy analyses and studies and policy briefs |
| Skills and competences: | <ul style="list-style-type: none"> • application of interdisciplinary approach between political science, economics and law • identify, analyse and practice different formal and informal rules and formats for policy-making, analysis and communication • methods of academic research and writing • formulation of practical policy strategies (how to write a policy brief) and “debating society exercises” • writing and presenting of an in-depth final paper of 25-30 pages |

Learning outcomes, methods and course content:

The practical component of this course will focus on relevant practical skills necessary in the political arena, esp. skills in writing a policy briefs, memos, political party declarations, press releases, resolutions in parliament position papers, drafts of European Council conclusions and as applications for EU-funded projects.

- Students will learn to identify, analyse and explain the opportunities and constraints of how the EU can influence policies and politics outside its own borders.
- Furthermore, they will prepare and present own work of practical relevance, e.g. a proposal for a chosen policy and a strategy for its enactment or implementation in the policy cycle in policy briefs, memos, declarations, press releases and drafts of political documents, such as EC conclusions etc.
- They will examine and evaluate real-life examples from political making or political agency
- They will apply their knowledge to own topics in formulating a 30-page in-depth analysis or study or a SWOT analysis and relevant policy briefs for the policy making arena.
- Overall, the students develop conceptual rigour through written assignments, oral presentations, small working groups and discussions with their peers and the professors of the programme. These skills are useful to enhance employability prospects in the EU-related labour market.

2. Research track

| | |
|--------------------------|--|
| Topic of Specialisation: | Individual research topic to be determined in cooperation with the thesis supervisor |
| Experts: | <p>Prof. Wolfgang Wessels, University of Cologne (Jean Monnet Chair ad personam / CETEUS)</p> <p>Mr Thomas Traguth, MA (oxon), MA (College of Europe)</p> |
| Character: | Individual research work within the chosen specialisation |
| ECTS Credits: | 12 ECTS |
| Teaching methods: | <ul style="list-style-type: none"> • Intensive supervision on research topic • readings and individual supervision through ICT-based technology • interdisciplinary presentation and discussions during workshops • research colloquium during the seventh workshop and peer evaluation of other research proposals • final presentation of own research work |
| Assessment methods: | <ul style="list-style-type: none"> • Exposé including an executive summary and outline, table of contents • research paper (leading to a master thesis) including methodology, literature review and bibliography • presentation of research paper during the third workshop of the second year • presentation and defense of the master thesis at the final workshop |
| Skills and competences: | <ul style="list-style-type: none"> • Interdisciplinary thinking and understanding across political science, law and economics • scientific skills and methodological competences with regard to one special research topic • fulfilling internationally accepted standards and methods of individual innovative research |

- inclusion of theory-based approaches for studying the practice of EU-related policy and political processes
- writing and presenting an own research paper

Learning outcomes, methods and course content:

The research track of this module allows the student to develop their own and independent in-depth research on a topic to be decided in cooperation with their supervisor. The key skill is to develop a research design and conduct the study over the period of 6 months in the form of a full master thesis of 60 pages.

The process involves the following key steps:

- identification of relevant topics and gaps of research to be addressed in the current research environment
- formulation of a new research question establishing causal relationships in order to elucidate underlying mechanisms of political developments and practice
- review of the academic literature on the chosen topic
- development of a theory-driven research approach which embeds the own research in an established framework within the contemporary academic environment
- formulation of own hypotheses relating chosen indicators in a causal connection or valid context
- selection of an appropriate methodology to conduct this individual research
- in-depth empirical studies through qualitative and/or quantitative research, based on reliable sources of data or own methodological choices, including interviews where possible
- discussion and evaluation of research findings and answering the research question
- identifying shortcomings and omissions and further research desiderata following from the results of the inquiry
- presenting and discussing own findings in a peer-review process to fellow researchers
- commenting other researchers' work in a peer-review process

4.3. Modules over two years – Skills and Competences and Methodology

4.3.1. Module Skills and Competences (3 ECTS)

The Executive Master in EU Studies offers modules which are organised along the courses of both the first and the second year of studies.

During the academic programme, students not only gain firsthand academic knowledge in the specific areas of study, they also acquire a number of skills and professional competences.

Although all course modules contribute to enriching the skills, competences and expertise of the students (see the details given in the course descriptions), the curriculum of the Executive Master in EU Studies contains this specific module designed exactly with the purpose of endowing the students with a series of additional competences. These resources and expertise are useful and decisive to complete the Master programme and are committed to the professional career. This module equips the students with several soft skills and competences usually needed in the working environment helping them to improve their ability and expertise when working for national, European or international organisations, in public or private sector.

The module runs over two years of the Executive Master in EU Studies.

First part: Skills and competences for today's professionals

The first part consists of a series of lectures, exercises, discussions and presentations (mainly during the workshops) and focuses on the development of those soft skills and competences, which are most needed in the daily work in any international working environment. Meetings with (inter)national experts and practitioners offer on one side the opportunity to discuss in depth current issues affecting the EU and its member states, on the other side provide valuable insights into decision-making procedures, offers dialogue and networking possibilities, allows the students to make use of the acquired knowledge in a more practical manner. Meetings with national, European and international experts and practitioners offer insights into decision making procedures and possibilities for dialogue and networking.

Skills and competences (Selection)

- How does it work? Understanding decision-making procedures in multi-level systems and in regional, national, European and international institutions
- Negotiation skills (e.g. simulation): identifying trade-offs, interests, capabilities, opportunities
- Communicating and arguing with success: presentation skills and non-verbal communication
- Intercultural competences
- Drafting of position papers, policy briefs and summary reports
- Working with media and journalists (e.g. press release, information cycle, blog writing)
- Understanding the functioning of social media
- Improving skills in networking and job hunting
- Understanding the functioning of European Agencies in Brussels and the EU
- The professionalism in national and European parliament
- Planning the career development (e.g. Apco worldwide)

Second part: Compulsory course to be chosen out of two

The second part consists of a separate project-based course where students are confronted with the typical issues of managing a project in an international context. The course part takes place from June to September.

Students must choose one of the two following courses:

| | |
|-------------------------|---|
| Topic: | Project Cycle Management and Logical Framework Approach |
| Expert: | Mr Emre Gür , CIFE / Barem Consulting |
| Character: | Optional |
| ECTS Credits: | 3 ECTS credits |
| Teaching methods: | Course material online, forum discussions, seminar and discussion at the presence workshops |
| Assessment methods: | Assessment of group work along with active participation in workshops and forum discussions. Group work consists of; preparation of a finalized logical framework and project submission materials with delivery of interim assignments leading to this final product. |
| Skills and competences: | A holistic view of project development including but not only limited to systematic analysis of problems and their inter-relations, logical framework methodology and Project Cycle Management (PCM) approach. Students also gain an understanding of activity-based planning and |

resource planning in the context of a project while having an overview of EU and international donors' perspective

Topic: **Strategic planning, implementation and evaluation of development programs in the EU (SPIED)**

Expert: **Ms Gyöngyvér Gyene**, independent consultant in EU cohesion policy, evaluations and sustainable development

Character: Optional

ECTS Credits: 3 ECTS credits

Teaching methods: Course material online, lecture, group work and discussion at the presence workshop, mid-course webinar, guided forum

Assessment methods: Presentation of assignment, active participation in team work, presence and online workshop and forum discussion

Skills and competences: Fundamentals of strategic planning and evaluation in the EU context, practice of forecasting and backcasting, practice of planning evaluations and creating and assessing an evaluation Terms of Reference (TOR)

Objectives and course content:

1. facilitate an understanding of the role and functioning of strategies in the context of EU development programs
2. learn how business strategies differ from public service ones
3. practice and have fun using some of the key tools used in designing, implementing and evaluating strategies within the institutional framework of the EU

The course content is focused on strategic planning and implementation roles at two levels: member state governments and the EU Commission.

4.3.2. Methodological classes

Methodological classes are inherent part of all advanced courses and within the specialisation phase of the second year. The fundamentals are laid during the non-graded basic course *Fundamentals of Scientific Work* (taught during the first year and has to be passed only).

These methodological classes empower students to develop and improve their ability to become part of any given academic and professional community and write a master thesis/final paper according to all standards of research and professional work.

The workload is counted within the respective courses and phases.

Special methodological classes take place in the second year in three parallel working groups related to the chosen specialisation, meaning for the respective module in which the students deepen their skills in scientific and professional work. Students learn how to apply different methods, theories and practises in order to meet all the requirements and to prepare the master thesis and final paper.

Theme/Topic: Methodological classes for the research and the professional track (How to write a master thesis/final paper in the chosen field of specialisation)

Experts: **Prof. Mattias Wendel**, Faculty of Law, University of Leipzig
Mr Edgar Lenski, German Federal Chancellery
Mr Ralf Kanitz, Federal Ministry for Economic Affairs and Energy
Prof. Wolfgang Wessels, University of Cologne, Jean Monnet Chair/ CETEUS
Mr Thomas Traguth, MA (oxon), MA (College of Europe)
Prof. András Inotai, Institute for World Economics (Budapest)
Dr Tamás Szigetvári, idem & Pázmány Peter Catholic University

Character: Compulsory

ECTS Credits: The workload is counted within the respective courses and phases.

Teaching methods: - Methodological classes/working groups, individual consultation -
 Lectures, course material and videos online, discussions at the

- presence workshops (June/September/January/April) and via moderated forum
- Research colloquium/Presentation and discussion sessions – presentation and defence of research papers and draft of final papers (March/April workshop)
 - Methodological classes introducing the students into the particularities of research/professional work, discussions of drafts (hypothesis, outlines, exposés, material of the master thesis)
 - Webinars

Assessment methods: Active participation in workshops, and in forum discussions, presenting and discussing outlines, exposés, research papers, draft of final papers

- Skills and competences:
(e.g.)
- How to write a master thesis/final paper
 - Methods of academic and professional research and writing
 - Arguing e.g. “debating society exercises”, legal reasoning and arguing
 - Policy-oriented assessment of the interdependence between and mutual impact of global economic trends and developments of the EU
 - Developing practical economic policy approaches
 - In-depth analysis of core issues of EU law, ECJ judgments and EU legal texts (“guided reading”), simulation of the proceedings before the European Court of Justice (including the oral hearing and the issuing of the judgment)
 - How to write a legal writ, a legal opinion, a policy brief
 - How to write abstracts and conclusions
 - How to write press releases

Learning outcomes, methods and content of methodological classes:

The classes deal further with the methodology of research and professional work. Methodological classes take place in parallel in order to prepare the students to write their master thesis/final paper. In working groups and via intensive contact with their supervisors, students learn to develop hypothesis, defining methods of their research work or learn specific professional skills. The methodological classes prepare and accompany the academic or professional writing on one research question (master thesis) or a professional task (final paper). During a research colloquium / discussion session students have to present and defend their first results of work.

The methodological classes accompany the specialisation by

- informing about the methods of research and professional work
- supporting the finding of a subject (first drafts)
- discussing the planned approach of the specific subject
- learning more about methodological issues such as citation, comparative analysis, multicultural and –language dialogue, as well as to interdisciplinary works; specific professional working methods
- supporting and discussing a detailed structure of the planned Master thesis/final paper in order to complete it within the time limits set by the Study Regulation.

Literature and links

Will be uploaded on the e-learning platform.

4.4. Master thesis/ final paper

(12 ECTS in total are awarded for the specialisation phase)

The topic for the master thesis/final paper needs to be agreed with the expert in the chosen module of specialisation. The writing of the master thesis/final paper will be accompanied by methodological classes, webinars, teaching sessions.

The deadline for the submission of the master thesis/final paper is the end of May (second academic year). The master thesis/final paper is presented and discussed during the final workshop. After that discussion students have the possibility to re-submit a final version until the end of August. The performance of the discussion and presentation is included into the result of the master thesis/final paper. Students are expected to submit the final version of the master thesis/final paper by the due date and in accordance with all criteria for scientific work. The volume is expected to be within the scope of 50-60 pages (master thesis) 25-30 pages (final paper) (see Study Regulation and Examination Rules /Executive Master in EU studies).

The master thesis is marked by the expert and may be read by a second person to be proposed by the expert. In cases where the master thesis/final paper or the defence of the master thesis/final paper does not meet the required standard and is sent back to the student for revision (e.g. if the expert marks the result as “insufficient”), the student can submit a revised version once more on written request. In such cases the Board of Examinations and Studies sets a new deadline. Only two different submissions are allowed.

5. Information on the organisers of the Executive Master (CIFE and its partners)

5.1. Centre international de formation européenne

Centre international de formation européenne (CIFE Nice)

5.2. Description of the institution

CIFE is a French private institution of higher education and research, founded in 1954 with its head office in Nice and branch offices in Berlin, Brussels and Istanbul.

It receives special funding in the framework of the Jean Monnet Programme/Erasmus + Programme of the European Union.

5.3. Programmes offered

The programmes of CIFE encompass educational and research activities concerning European unification and integration, federalism, regionalism and changes within the structures of contemporary society in accordance with a global federalist prospective.

CIFE organizes each year post-graduate programmes (Master presence and Blended Learning programmes), evening courses and summer sessions, which bring together students of all nationalities.

5.4. Management

| | |
|--------------------|-------------------|
| President: | Herman Van Rompuy |
| Director General: | Matthias Waechter |
| Secretary General: | Ryszard Piasecki |

5.5. Admission and registration procedure

Each programme offered by CIFE has its own procedures for admission and registration.
